GROWING FROM MALAYSIA TO DUBAI

ONGOING INTERNATIONAL PROJECT IN DUBAI

ABOUT US & OUR HISTORY

Kilstant White Ants // Kilstant Sdn Bhd is a fully integrated end-to-end Termite Engineering, Management, and Solutions provider headquartered in Ipoh, with branches in Selangor, Malaysia.

We are the leaders in the Advance Termite Reticulation System. This decision was made after we innovated, researched and developed the Termite Replenishable System or also known as Termite Piping System in 2010 and gained full patent rights.

This move shifted our focus, energy, resources to further perfect the system, functionality, delivery and operating procedures as a building material against termites. We strategically moved to patent the Kilstant Reticulation System.

This approach combined with years of experience of tackling termite problems for buildings in Malaysia has ensured Kilstant White Ants to be the first Termite Engineering & Management Company in existence

Our flagship Advance Termite Replenishable system, Kilstant Reticulation System & Kapping System is now sought after by Architects, Interior Designers, Contractors, Home & Building Owners to protect against termite infestation.

THE TEAMS

Mr. Balakrishnan (Founder)

The founder, **Mr. Balakrishnan**, was born on **5th February 1949**, and raised in **Changkat Salak Estate**, Perak. He attended school in **Clifford, Kuala Kangsar**. Life in the estate was rough, tough and to grow out of the circle to find opportunities was the only way. Education didn't side him due to family, financial circumstances.

The only way out of poverty is to pick up a skill and start a business or career out of it. He moved to Ipoh on a bus and started his journey and life. He worked with a well known Pest Control company known as Kilsure White Ant Co before moving on his own and starting Kilstant White Ants in 1975.

The man is often **quiet, observant & creative** to think of a solution. Mr. Balakrishnan founded the patented Advance Termite Reticulation System. **The Rest is History !**

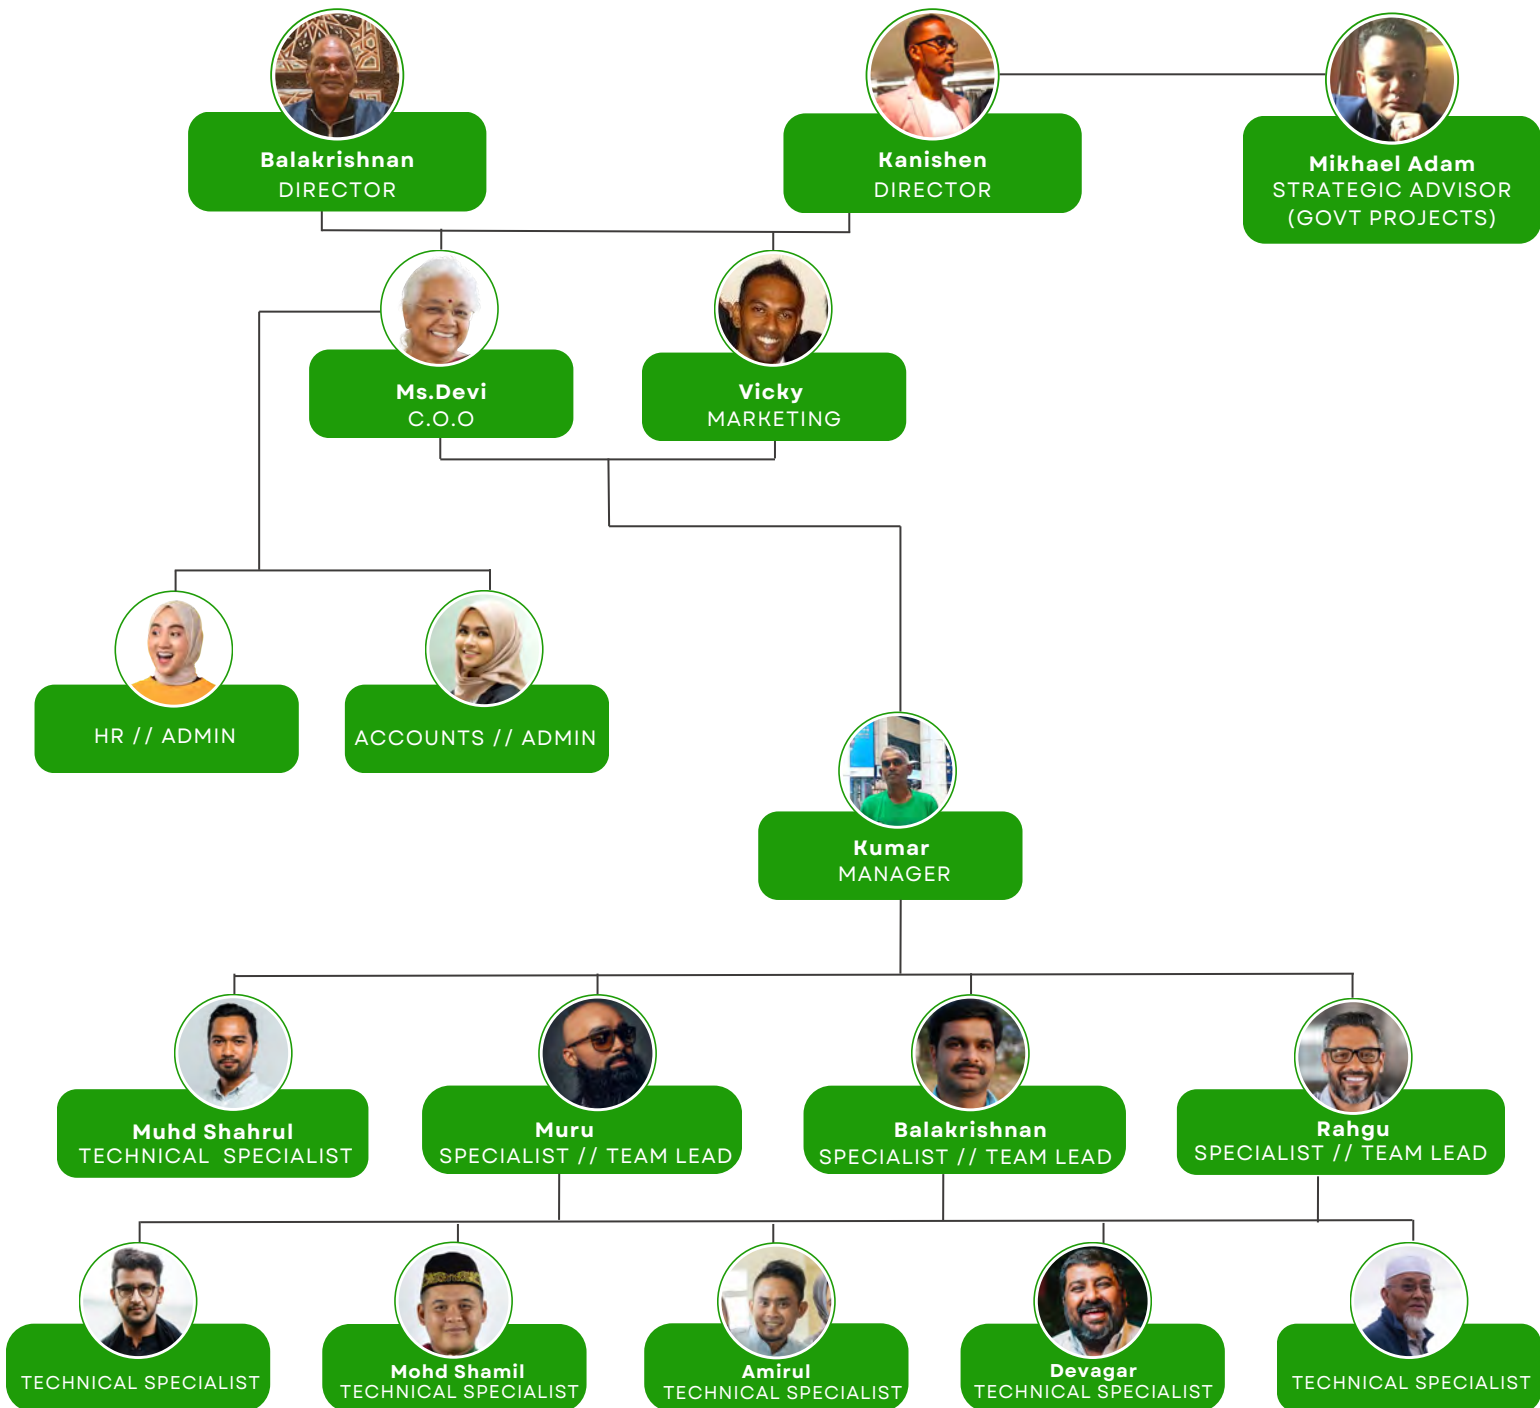

Mr. Kanishen (Business Creative Director | Strategist)

Mr. Kanishen helms the position of the **business development**, and **creative strategist of Kilstant**. He holds the responsibility of growing the brand, business and strategizing the moves to ensure the growth is sustainable, and creating the needs of businesses and building owners.

He collaborated ideas of implementation and further improving the patented Termite Reticulation System from the drawing board to ground works and forth.

Mr. Kanishen holds an Engineering degree and is a creative person naturally. Apart from business and work, he is fond of **strategizing growth, exploring, reading fitness, sports, traveling dancing & music**. He can be reached out at on his social media pages.

ORGANIZATION CHART

OUR SERVICES

NEW PROPERTY (PRE CONSTRUCTION TREATMENT)

Introduction

Termite Treatment during pre-construction stages is a MUST to eradicate termites attempting to gain entry into the building.

Kilstant practices both Soil Treatment Method & the patented **Advance Termite Reticulation System** for projects. We perform the **Advance Termite Systems** for **Local & International Projects**.

BASIC SERVICE

TERMITE RETICULATION
SYSTEM

EXISTING PROPERTY (EXISTING PROPERTY)

Introduction

The regions of South East Asia are highly dense with termites due to the tropical climate. Malaysia's tropical surroundings is a good breeding ground for termites because of temperature, climate, dampness and abundant food sources.

In most cases, existing residential & commercial buildings are very prone to termite attacks. It does not matter if you are residing in a LANDED PROPERTY or HIGH RISE, termites are bound to attack.

CLIENT TESTIMONIES

01 - Tidalmarine Engineering

Nik Abdullah Mu'az Nik Mohd Kamel
(Project Director)

Kilstant White Ants has been appointed to secure the Istana Hinggap Negeri Sembilan against termites since April 2013. The company's performance has been demonstrated with a professional work high technical capability and providing the best solutions.

Kilstant White Ants is an expert for using new methods and solutions called the Kilstant Reticulation System to further improve the practices in the best way to avoid termite attack while keeping with an eco-friendly solution to the environment. This has benefited to the new high profile project. We highly recommend Syarikat Kilstant White Ants and their innovative termite system, Kilstant Reticulation System to any client.

02 - Acasys Group

Mark Chew (Project Manager)

Kilstant has been a very attentive and reliable contractor for our project (2 and a half-storey residential bungalow) at The Peak, Ampang. They have been pro-active, quick to identify potential problems and resolve them.

Their Kilstant Reticulation System was a new concept to our client, but Kilstant were there to support us with any questions and doubts throughout planning and installation. We were happy with the testing and commissioning of the system and we are pleased with the outcome thus far.

We highly recommend them.

03 - Idham Nawawi

I was recommended Kilstant by my architect. From the day I met Kilstant White Ants, they have been very professional. The staffs are very polite and they get the work done very professionally, as per my requirement.

04 - Stalin Raj

Discovered recently that the main door at home was totally eaten up termites. I got referred to Kilstant by a mutual friend gave them a call and Kilstant Management was at my house the same night.

They gave me a technical rundown on what they were looking for, their habits, and how to avoid future possible incidences. And they got the job done within the next day. I highly recommend their services, and if I need any other home services, they will be the first I call.

05 - Adam

Happened to be cleaning my kitchen cabinets one Sunday morning and to any home owner's horror, I discovered the tell tale sign of termites. My mind immediately raced as I did a mental calculation of the budget I had currently in my bank account and the cost of the getting a pest control person in to handle the problem. As with termites, the issue has to be deal with immediately.

My family member recommended Kilstant and I called them immediately. Kanishen himself came to my home within 3 working days and assessed the situation. To my relief, they would start work the next weekend to prevent further damage, and could arrange payment terms. The works was done very professionally and completed within 5 hours. Thus far, I have no repeat issue of the termites problem and their service comes with a 2 year gurantee.
